(a) fits training set within budget
fraction of runs reaching 99% train acc.
width
f=0.2 real
f=0.2 random
f=0.3 real
f=0.3 random
f=0.5 real
f=0.5 random
(b) memorisation time, real vs random
t_{fit} random labels (median)
t_{train} real labels (median)
f=0.2
f=0.3
f=0.5
(c) t_{train} vs width by train fraction
width
f=0.2
f=0.3
f=0.5
