(a) synthetic, random k, SNR=0.5
(b) synthetic, random k, SNR=2
(c) synthetic, random k, SNR=8
excess error (MSE − ψ)/ψ
benchmarks run, k
$r = 1$ (MC)
$r = 3$ (MC)
$r = 8$ (MC)
Jensen lower bound
Wishart upper bound
(d) synthetic: greedy vs optimum
random → optimal gap closed
cond. variance, mean
log-det, mean
worst instance (40)
iid
hetero
cluster
k
(e) synthetic rank 3: Bayes vs CV
nMSE
(f) MTEB-56: train-fit Bayes vs CV
random
greedy cond. variance
greedy log-det
Bayes, train-fit (±1 sd over folds)
Bayes, fitted on all models
